

Kastle Remote Guarding Relieves Multifamily Security Burden

Shelter-in-place orders result in continuous maximum resident occupancy.

Existing security operations are strained by the full-time capacity volume.

Resident employment disruption is shrinking rental revenue flow.

Need an increased security presence – but security guards are not the answer?

Kastle Remote Guarding can boost your security without increasing headcount on-site.

- » **Prompt Response to Loitering and Resident Infractions**
Video analytics can detect activity and stream video to Kastle's 24/7 operations center where our operators can issue live loudspeaker intervention.
- » **RemoteGuarding** – Consistently cover a larger area than a security guard, without added headcount.
- » **Remote Patrol** – Video-based patrol can regularly inspect property and assets for unwanted activity.
- » **No, or little capital investment** – We can conceivably use your existing cameras.
- » **Stairwell Monitoring** – Observe stairwells or other community spaces for excessive loitering.
- » **Event Verification** – Shortens response time and improves accuracy. Appropriately deploys security resources where they are needed.
